Use of pressure equipment according to its designation:

Application of the valves in pipelines in order to prevent reflux action respectively to control or to shut-off the medium within the admissible limits of pressure and temperature under consideration of chemical and corrosive influences on the pressure equipment. The application in fluid class 1 and fluid class 2 is admissible.

The resistance of the valve to the medium has to be checked for the existing operating conditions.

We declare this pressure equipment to be conform with Directive 97/23/EG
